Biography

Melodic Groove Metal, what more could you want? Source of Rage from Lower-Saxony/Germany is the prototype exactly for that. In particular for making you bang your necks like there's no tomorrow while still delivering catchy melodies paired with technical refinement – to be clear, Source of Rage is representing everything you need for getting the vibe and groove of heavy music and having a good time with a nice and cool drink.

Oliver Roffmann and the three brothers Marko, Riko and Thilo Krause are the perfect musical and personal matchup. The first EP entitled *antagonize* was released in 2015, followed by the full-length-debut *Realise the Scope* two years later, which was recorded at Institut für Wohlklangforschung/Hannover. The album deals with the topics of friction, aggression, different approaches of thinking and therefore resulting positive energy within the people.

This very mixture led to the participation and the triumph in the national final of the Wacken Open Air Metal Battle. Besides gigs at Wacken Open Air and Dong Open Air where Source of Rage shared the stage with bands like Kataklysm, Alestorm, Insomnium and many more, they released several music- and live-videos promoting *Realise the Scope* and gained experiences on international stages.

2021 marks the next significant step for Source of Rage starting off with the release of the first video-single of the upcoming 2021 album. *Aware* was recorded by world-renowned producer Lasse Lammert at LSD-Studios in Lübeck. The new songs are more advanced than the predecessors'. They are designed to establish their own subgenre and elaborate a more unique feature within sound and content topics. In the long run it is Source of Rages to stand out of the great mass of good modern metalbands.
